

CleanTec CTD900

The 900 is our largest machine to incorporate the compact “tank within a tank” design, allowing for use in confined areas.

The 900’s come in two models, one-motored or two-motored, both incorporating our TwinFlo bypass motors and integrated Powerflo’ pump system. The pump system injects the cleaning solution deep into the carpets in a continuous deep cleaning cycle and these bigger machines will cover an area more than three times that of our smaller machines, without the need for emptying, this is especially important in office blocks and high rise apartment blocks.

- All Purpose 4 in 1**
 Dry, Wet, Spray extraction carpet cleaning and upholstery cleaning/car valeting.
- Tank Within a Tank**
 Simple, clean and efficient. This unique design allows an easy to fill and quick to change system.
- Structof foam Construction**
 Heavy duty Structof foam used in both head and body construction.
- Easy to Empty**
 The unique tipper system incorporated within the chassis design allows for the machine to be emptied in floor drains or WC’s where available.
- On the Move**
 Large rear wheels provide stability during transportation.
- Nucable System**
 Power cables can be changed without the need for an electrical engineer
- Full Accessory Kit**
 Supplied with carpet, upholstery cleaning, wet and dry accessories.
