- 10 90-degree tilt deck for easy pad change.

Featuring...

**STEADY One**  
TECHNOLOGY

**SteadyOne™** uses advanced fluid drive technology to maintain constant pad pressure and produce more consistent results. Unlike other machines using spring mechanisms that vary when a metal coil compresses or extends, **SteadyOne™** automatically adjusts the deck as the pad wears to apply the same pad pressure throughout the burnishing operation. Floor care professionals can now get the same one-pass results today...and tomorrow.
