

MAINTENANCE CHART

SASMVNo1

SANTOEMMA SABRINA

AFTER EVERY USE, ENSURE THAT YOU COMPLETE THE FOLLOWING 3 STEPS

1.

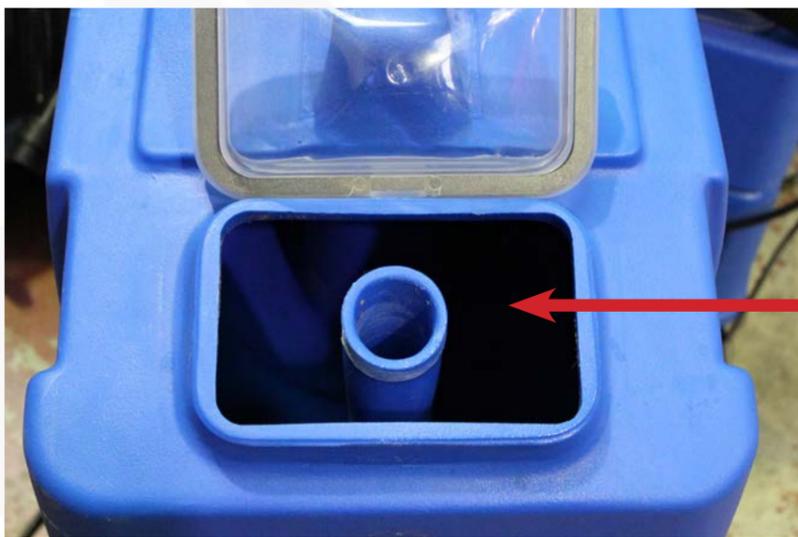

Clean out top recovery tank thoroughly, flush with clean water.

2.

Run vacuum for 10 minutes with the top dome removed. This will dry out any moisture that is sitting near the motor.

3.

Always leave clear dome to one side or upside down. This will help the tank not to condensate, consequently extending the life of the vacuum motors.

MAINTENANCE CHART

SANS270VNo1

SANTOEMMA NS270 WAND

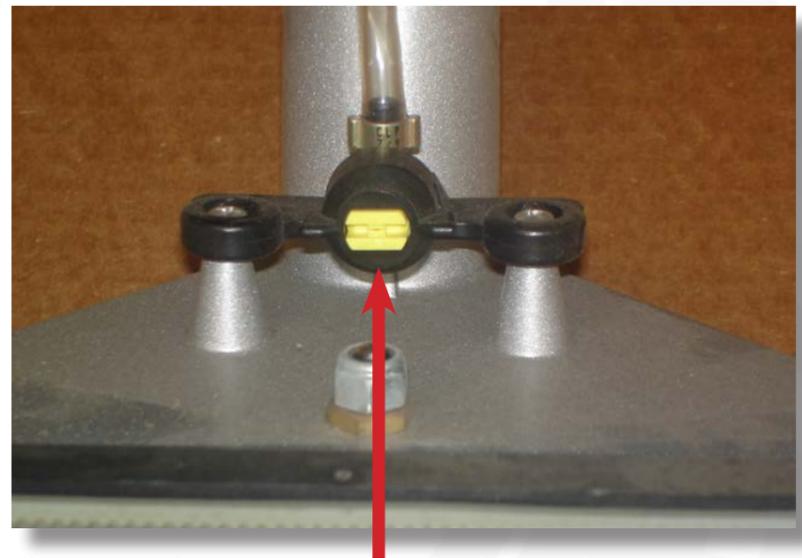

AFTER EVERY USE, ENSURE THAT YOU COMPLETE THE FOLLOWING 3 STEPS

1.

Disconnect wand from hose and turn upside down over a drain. This will empty the wand of water to keep it in good condition when not in use.

2.

Remove jet nozzle and holder, clean out regularly. Replace nozzle when it loses its ability to evenly fan the water spray.

3.

Remove carpet fibres from inside fishtail and stainless steel wand. A bottle brush is very useful for this.
