

# Hi-Bak<sub>HB1812</sub>

## The HB1812 represents a super compact, truly professional dual compartment mopping unit.

Our unique parabolic separator allows a generous 18 litre front clean water container and 12 litre dirty water section to the rear.

The 60% / 40% split in container capacity is genuinely practical, allowing larger areas to be cleaned before emptying and refilling is required.

For smaller applications the separator may be reversed and the press placed in its lower mounting position, resulting in a truly extra compact system. In the event of a single 30 litre bucket requirement, the parabolic separator can be easily removed.
