

NuClean AT

The NuClean AT System is based on 5 major factors:

NCK-200AT

Detachable Wide Press 22/18 litre Mopping Unit.

NC-3000AT with NCK-200AT

1. Our magnetic door system fulfills the need for fully enclosed, yet fully accessible, cleaning and waste facilities - on hand, yet not on view.
2. Full, big capacity mopping and waste systems, to be selected as required, to suit different applications.
3. Provision for detaching and attaching the mopping and waste unit as, more often than not, they are best used independently and only reattached for transit purposes.
4. A wide range of additional facilities to increase the versatility of the system.
5. The ability to rearrange facilities and attachments at anytime to respond to changing needs and changing locations.

AT 'All-Terrain' model

NC-4000AT

The NuClean AT units are designed with giant 8", soft ride, heavy duty castors to aid movement in uneven terrain but can only be used together with onboard attachments, not the detachable system.

NC-3000AT

One of the exceptional features of all NuClean units is the double sided, fast acting magnetic door system. This allows full and easy access from both sides at any time.

EcoDry Specifications

NuClean AT

Better by design...

NuClean AT

NC300AT and NC4000AT, highly compact professional cleaning system, available in 4 individual styles:

NC-3000,
NC-4000 and
NC-3000AT,
NC-4000AT.

With a range of 4 'Lock on' detachable modules for the NCs and 5 'Onboard' attachments for both the NCs and the ATs, providing exceptional versatility and practicality in a single design concept.

Available in 2 master modules, the NC-3000 with enclosed 120L pedal waste and storage, or NC-4000 with full storage if required.

NC-3000AT

NC-4000AT

So simple - On and Off with ease...

A major advantage of the NuClean system is the easily detachable, and conversely attachable, professional, independent mopping units able to be used in either mode but with added manoeuvrability and usability in detached operation - especially in congested areas.

NC-3000AT
with NCK-100AT

NCK-100AT
Detachable Vertical
22-litre Mopping Unit.

The NuClean attachment and detachment system is simplicity itself but by the unique interlocking design each arrangement is exceptionally stable and robust, be it in the attached or detached mode.

A choice of two full mopping units and additional waste systems.

'Onboard' Kits...

← SprayMop Mopping Kit

The SprayMop kit NCK-800 is an exceptional spot cleaning system with all the benefits of Nylostrip cleaning performance and builtin pump-action reservoir for the chosen cleaning preparation.

NCK-800

120L Waste Kit →

The NCK-500 compact 120L 'Onboard' waste module.

NCK-500

← MopMatic Kits

Single (NCK600) or Twin (NCK700), the MopMatic MopBox system provides up to 20/24 pre-impregnated mop heads allowing controlled coverage of extensive areas without mop and bucket facilities.

NCK-600

Xtra Twin 5-Litre Pails with BioBox Kit →

NCK-900 allows additional pails and a 30-litre BioBox waste unit to be fitted.

NCK-900
