## PIONEER ECLIPSE FLOORCARE RANGE

---

Since 1978, Amano Pioneer Eclipse Corporation has manufactured a comprehensive line of equipment and chemical products for cleaning and maintaining virtually all types of floors and facilities worldwide. The Pioneer Eclipse Floorcare Program makes it easy for floorcare professionals to put the right machines with the right chemicals, and save real time, money and energy as a result. The floor finishing and maintenance experts at Amano Pioneer Eclipse have done the calculations. For carpet, hard floors, linoleum, wood, or vinyl composite tile. With variables based on shine, traffic and burnishing days.

## FLOOR FINISH

---

### 130 STA-BRITE - DRY BRIGHT FLOOR COATING

An excellent, low maintenance coating with outstanding resistance to scuffs, scratches, black heel marks and detergent scrubbing.

Pack Size: 2 x 10 Litre

### 103 EQUINOX - UHS FLOOR FINISH

A high solids formula for ultra high speed ("UHS") applications. Produces a coating so tough that it significantly reduces the frequency of re-coating and burnishing. Provides excellent gloss, scuff resistance and long lasting durability.

Pack Size: 2 x 10 Litre

### 138 TOTAL ECLIPSE - UHS FLOOR FINISH

A polyurethane-fortified acrylic co-polymer floor coating especially suited for concrete, stone and similar hard floor surfaces. Total Eclipse is a clear, non-yellowing formulation that creates an extremely durable and scuff resistant shine. Self-sealing!

Pack Size: 2 x 10 Litre

### 141 OMNIGUARD - UHS FLOOR FINISH

For high traffic areas that require a durable and easy to maintain surface, Omniguard is the obvious choice. The high solid formulation of this UHS floor finish produces extreme gloss that withstands the effects of crowded market places in any weather condition.

Pack Size: 2 x 10 Litre

## CLEANER MAINTAINERS

---

### 211 REBOUND - CLEANER ENHANCER

An effective one step cleaner and enhancer. May be applied by automatic scrubber or damp-mop. Cleans and enhances coating for a brilliant wet-look shine when burnished with UHS burnishers.

Pack Size: 2 x 10 Litre

### 301 ECLIPSE - NEUTRAL ALL PURPOSE CLEANER

Our all purpose daily floor cleaner removes dirt and soil without harming the shine. May be used on all washable surfaces. Excellent for deep scrubbing.

Pack Size: 2 x 10 Litre

### 338 ENVIROSTAR GREEN - ALL PURPOSE NEUTRALIZER

Concentrated "green" neutralizing solution is effective on resilient tile and all types of stone flooring. Increases adhesion of coatings to floors where alkalinity is a problem.

Pack Size: 4 x 4 Litre

### 342 REBOOT - DEEP SCRUB CLEANER

A floor cleaner designed specifically for use in deep scrub applications where the removal of 1-4 coats of floor polish is intended.

Pack Size: 4 x 4 Litre

### 396 ECLIPSE HD - HEAVY DUTY DEGREASER

A heavy duty degreaser cleaner that rapidly removes the most stubborn greasy soils.

Pack Size: 4 x 4 Litre

## FLOOR SEALER

---

### 403 ECLIPSE HARD FLOOR SEALER

A water-based acrylic formula sealer for concrete, stone and similar hard floor surfaces.

Pack Size: 2 x 10 Litre

## FLOOR STRIPPER

---

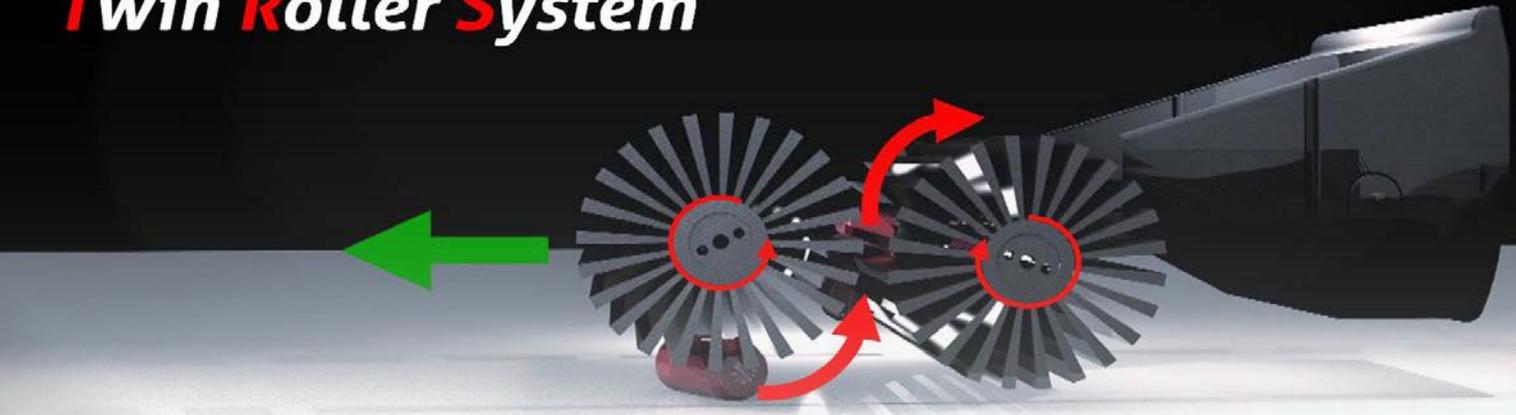

### 549 FORMULA X-TREME - ULTRA HIGH PERFORMANCE STRIPPER

Concentrated, powerful, non-ammoniated formula cuts through heavy build-up and hard to remove water-based seals in record time. Low odour! 1 carton can make up to 800 litres of stripping solution.

Pack Size: 2 x 10 Litre

# Twin Roller System

## TWIN ROLLER SYSTEM EXPLAINED.

The two rollerbrushes counter-rotate, the front one in the direction of travel and the rear one counter to the direction of travel. In this case, the front rollerbrush operates purely as a transportation roller, and therefore rotates in the air without coming into contact with the ground - it is not, therefore, subject to wear, and requires only a small amount of force.

The refuse which has been passed over by the front brush is passed between the two rollers and transported upwards. The dirt which is transported upwards due to the interaction of the rollers is guided backwards via an exactly defined guide plate which is positioned above the point at which the rollers intersect. This is therefore fed over the rear roller into the dirt-collector.
