Quick Set-up Guide

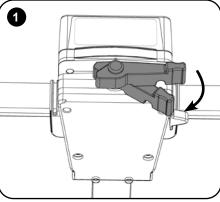

PLEASE READ BEFORE COMMENCING ANY OPERATION. AFTER THE REMOVAL OF ALL THE PACKAGING, CAREFULLY OPEN AND CHECK THE CONTENTS.

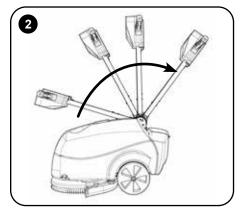

TTB 1840 36V CONTENTS

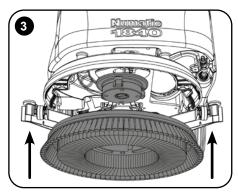

- Owner Manual
- Battery & Charger Manual
 - Battery Charger & Lead
 - Battery Scrub Brush
 - Squeegee Assembly

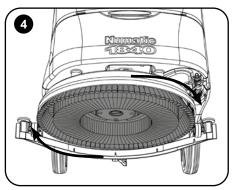

Using the handle position lever, (Fig.1)

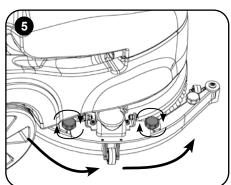

Move the handle into the upright position, (Fig.2)

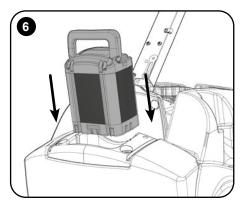

Slide the brush / pad under the brush deck (Fig.3).

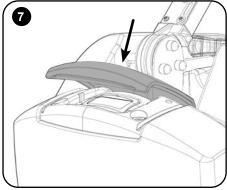

Fit the brush / pad onto the Nulock drive chuck, twist to lock the brush / pad in place (Fig.4).

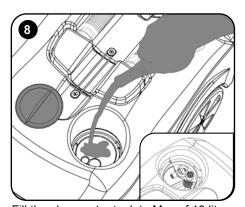

Swing the floor-tool carrier from behind the brush. Using the two locking knobs fitted to the floor-tool, secure the floor-tool to the floor-tool carrier (Fig.5).

Slide the battery into the battery compartment (Fig.6)

Close the flexible lid making sure it is sealed correctly. (Fig.7)

Fill the clear-water tank to Max of 18 litres

ALWAYS ENSURE THAT THE FLOOR IS PRE-SWEPT AND RELEVANT SAFETY SIGNS ARE DISPLAYED.

Machine Set-up Guide

ALWAYS ENSURE THAT THE MACHINE IS SWITCHED OFF BEFORE MAKING ANY ADJUSTMENTS

Fitting the Brush / Pad / Turn on water

400mm Brush / 360mm Pad.

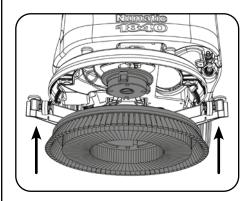

Featuring the Nulock brush system.

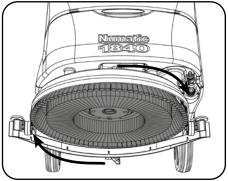

The brush is simply pushed and twisted to lock, making fitting and removal a simple process.

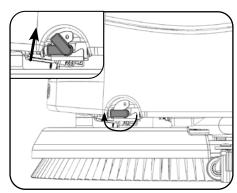

Slide the brush / pad under the brush deck.

Fit the brush / pad onto the Nulock drive chuck, twist to lock the brush / pad in place.

Safety gloves are recommended for the changing of used brushes. Turn on the clean water tap.

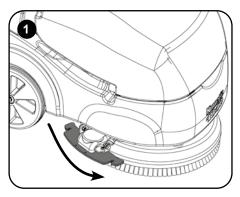

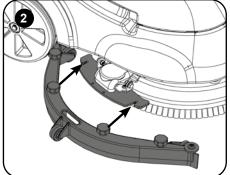

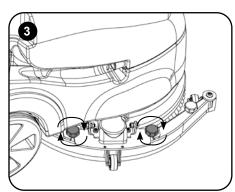

Fitting the Floor-tool

The floor-tool has been designed for quick fitting, allowing easy squeegee blade replacement and a safety knock-off feature if the floor-tool gets snagged, whilst in transit.

NOTE: It is easier to fit the floor-tool if the weight of the machine is resting on the brush. Ensure the brush is fitted first.

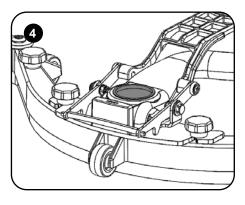

Swing the floor-tool carrier to the side of the machine. (Fig.1).

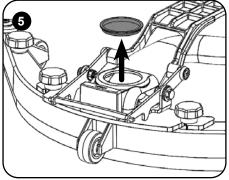

Secure to the carrier using the two knobs fitted to the floor-tool carrier (Fig.2) - (Fig.3).

Do not over tighten the retaining knobs.

Ensure inspection cap is in place on the fluid pipe. (Fig.4) - (Fig.5)

For fitting the floor-tool blades (See Page 10).

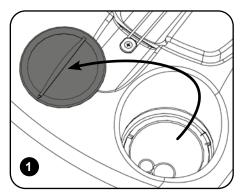

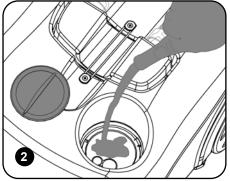

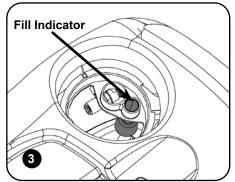

Machine Set-up Guide

Filling the Clean Water Tank

The TTB 1840 is equipped with a large 18 litre clean-water tank allowing large areas to be cleaned in a single fill.

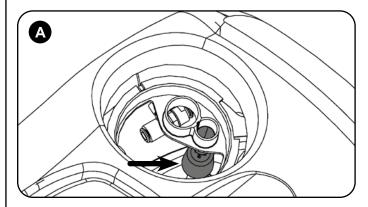

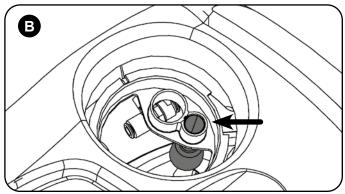

To fill the clean-water tank, remove the filler cap (Fig.1). Fill using a hose or a suitable container (Fig.2). Use the fill indicator (Fig.3).

NOTE: Great care must be taken to ensure that contaminants (leaves, hair, dirt, etc.) are not allowed to enter the clean water tank during the filling process. If using a suitable container, ensure it is always clean and free from debris.

Fill Level Indicator

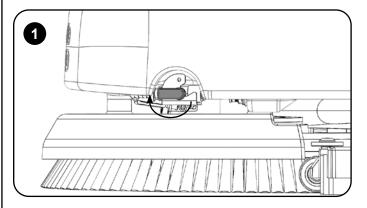

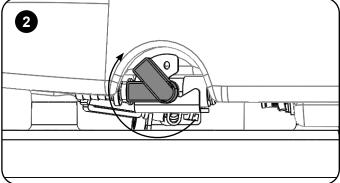

Showing the clean-water tank empty (Fig.A)

Showing the clean-water tank full (Fig.B)

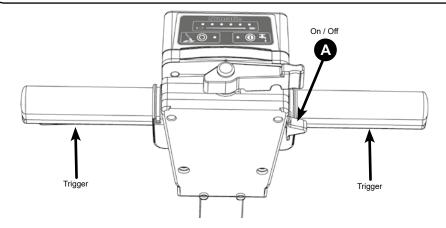

Water Flow Adjustment

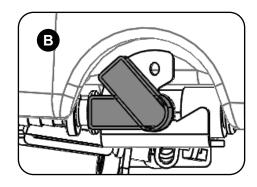

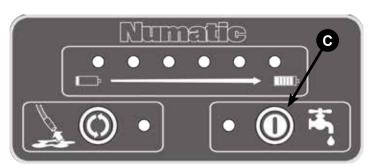

Located on the left of the machine is the On / Off water tap (Fig.1). Set the tap to enable the cleaning solution .(Fig.2).

Setting the Cleaning Controls

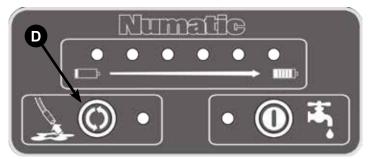

To check the battery level pull one of the Triggers or press button (A).

To start the brush with the configured water and vacuum settings pull either trigger and press the Start switch (A). **Note:** that the start switch (A) must be pressed after the trigger is pulled.

The running state of the vacuum and water can be adjusted with or without the brush running. First pull one of the triggers then press the vacuum and water buttons to set the desired operation .These states will be stored for use when the machine is restarted.

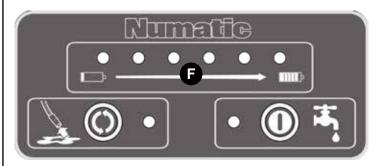

When the Triggers are released the brush motor and the cleaning solution pump will switch off, the vacuum motor will continue for 10 seconds.

To Enable /Disable Vacuum press button (D).

Note: that the vacuum can only be stopped by pressing the vacuum button (D) pulling the triggers will have no effect.

The panel if unused, will automatically turn off after 60 seconds.

System Error Indicators

In the event of a fault the battery lights (F) will flash and the unit will stop operating.

The lights will flash a number of times then pause.

The number of flashes can be used to identify the fault.

- 1) Battery Low
- 2) Battery over temperature
- 3) Battery communications error
- 4) Control board over temperature
- 5) System power exceeded
- 6) Vacuum overload
- 7) Brush overload
- 8) Control board failed

Releasing the handle triggers will allow the machine to reset.

IMPORTANT

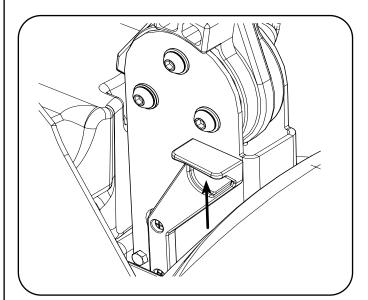

If the brush motor keeps overloading consider using a different type of brush. Heavy brush load decreases the available battery run time.

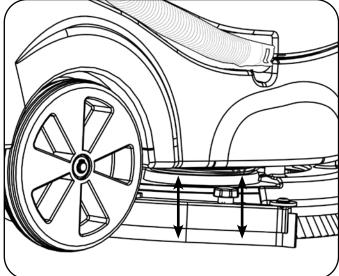

Machine Operation

Raising/Lowering the Floor-tool

To raise the floor-tool, ensure the floor-tool carrier is central to the machine. Lift the lever near the base of the handle and lock into position.

WHEN HANDLING CHEMICALS

Always ensure that chemical manufacturer's safety guidelines are followed. Only use chemicals recommended for use in auto scrubber-dryers.

IMPORTANT

Do not operate machine unless the Operator Manual has been read and fully understood.

Machine In Use

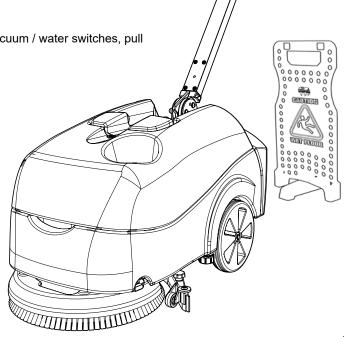

To operate, set water flow rate tap, lower the floor-tool, press the vacuum / water switches, pull trigger(s).

The waste water is then retrieved by the suction floor-tool. Overlap each scrubbing path by 10cm to ensure an even clean. Do not operate the machine on slopes that exceed (2%),when full.

On heavily soiled floors use a 'double scrub' technique. First pre-scrub the floor with the floor-tool in the raised position, allow the chemical time to work then scrub the area a second time with the floor-tool lowered.

If streaking occurs wipe floor-tool blades clean.

NOTE: Care must be taken to reduce speed when cornering or when manoeuvring around obstacles

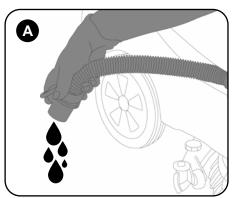

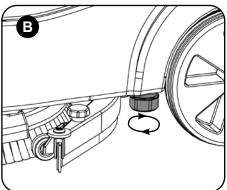

Regular Maintenance

ALWAYS ENSURE THAT THE BATTERY IS REMOVED PRIOR TO ANY MAINTENANCE OPERATION

Emptying Top Tank

After use, empty waste-water tank using emptying hose and flush-out with clean water. (fig.A).

Emptying Bottom Tank

The clean-water tank can be drained via the red cap fitted to the left hand side of the machine. There is a sealing bung beneath the red cap (ensure the sealing bung is clean) The cap should only be done up by hand. (fig.B).

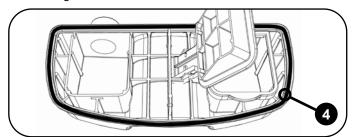

Separator

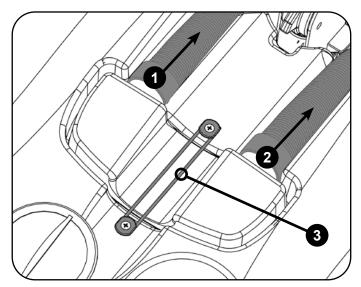

Remove the two hoses to disconnect the separator from the machine (1 & 2).

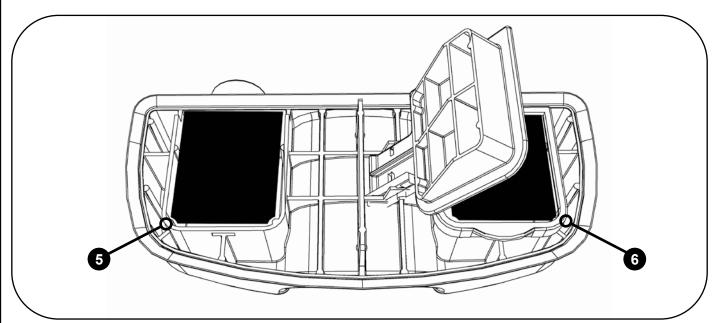

Remove fixing band holding separator in place (3).

Lift off the separator. The separator has a sealing-rubber which should be examined at every clean-down (4).

Rinse using clean water.

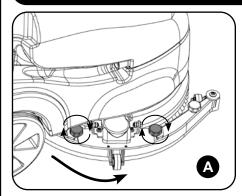

Remove the filter and basket clipped into the separator and flush with clean water (5 & 6). Replace the filter by first fitting the rear of the filter first then clipping in the front to lock in place (5).

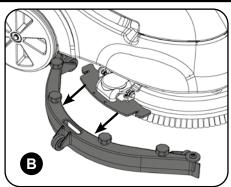

Regular Maintenance

ALWAYS ENSURE THAT THE BATTERY IS REMOVED PRIOR TO ANY MAINTENANCE OPERATION

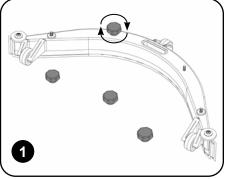

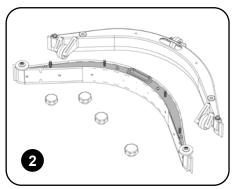

Changing the Floor-tool Blades

To change the floor-tool, firstly swing the floor-tool clear of the machine. Undo the two floor-tool retaining knobs (Fig.A).

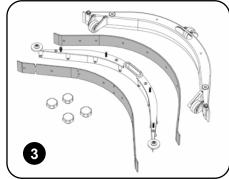

Pull the floor-tool away from the machine (Fig.B).

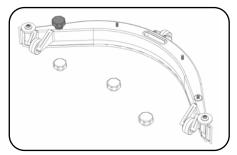

Unscrew the four knobs securing the blade holder (Fig.1).

Remove the blade holder (Fig.2).

Replace the Squeegee blades using (903531) replacement blade set (Fig.3), fitting the blades on to the moulded location lugs.

Refitting the Floor-tool Blades

Refit the blade holder, retain using the two outer knobs.

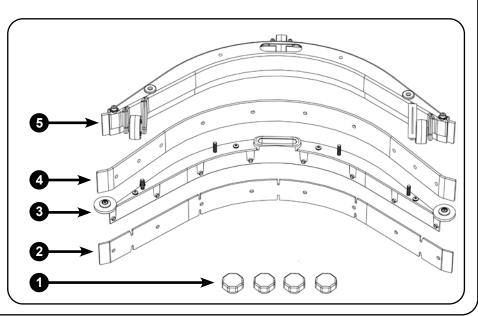

Ensure the slotted blade goes to the front of the floor-tool.

Note: The blades are designed to be reversible, thus extending their useful working life

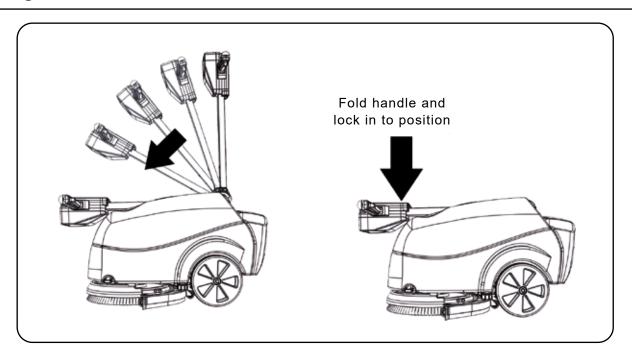

Refit the floor-tool using the two central knobs to the floor-tool.

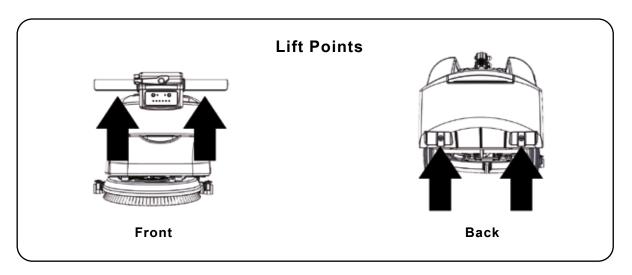

Floor-tool Overview

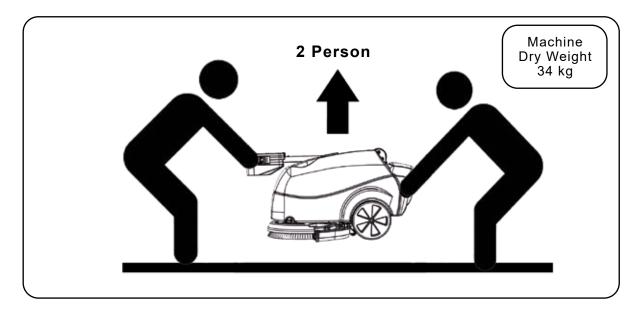

- 1. Retaining knobs x 4
- 2. Front blade (slotted)
 - 3. Blade carrier
 - 4. Rear blade
- 5. Floor-tool main body

WEEE (Waste, Electrical and Electronic Equipment)

Scrubber dryer Accessories and packaging should be sorted for environmentally-friendly recycling.

Do not dispose of scrubber-dryer into household waste.

According to the European Directive 2012/19/EU on waste electrical electronic equipment and its incorporation into national law.

Scrubber-dryers that are no longer suitable for use must be separated, collected and sent for recovery in an environmentally-friendly manner.

PPE (Personal protective equipment) that may be required for certain operations.

NOTE: A risk assessment should be conducted to determine which PPE should be worn.

Safety Critical Component:

Charging Leads: H05VV-F x 1.0 mm² x 3 Core Battery Charger: 100-240 Volt

In the event of a breakdown contact your Numatic dealer or the Numatic Technical help line +44 (0)1460 269268

Information for Scrubber Dryer

COMPONENT	INTERVAL	INSPECT FOR
Brushes	DAILY	Bristle damage, wear, drive collar wear
Squeegee Blade	BEFORE EACH USE	Wear, cracks, splits
Filters	BEFORE EACH USE	Clogging and debris retention
Tanks	AFTER EACH USE	Rinse dirty water tank after use

Read the instruction manual before using the appliance.

As with all electrical equipment care and attention must be exercised at all times during its use, in addition to ensuring that routine and preventative maintenance is carried out periodically in order to ensure its safe operation.

Failure to carry out maintenance as necessary, including the replacement of parts to the correct standard could render this equipment unsafe and the manufacturer can accept no responsibility or liability in this respect. When ordering spare parts always quote the Model Number / Serial Number specified on the Rating Plate. Warning do not use on slopes exceeding 2%.

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and

Children should be supervised to ensure that they do not play with the appliance.

When detergents or other liquids are used, read the manufacturer's instructions.

Only use brushes provided with the appliance or those specified in the instruction manual.

The use of other brushes may impair safety.

A full range of brushes and accessories are available for this product.

Only use brushes or pads which are suitable for the correct operation of the machine for the specific task being performed.

It is essential that this equipment is correctly assembled and operated in accordance with current safety regulations.

When using the equipment always ensure that all necessary precautions are taken to guarantee the safety of the operator and any other persons who may be affected.

Wear non slip footwear when scrubbing. Use a respiratory mask in dusty environments.

When cleaning, servicing or maintaining the machine, replacing parts or converting to another function the power source shall be removed.

Battery operated machines shall be disconnected by removing the battery.

Machines left unattended shall be secured against unintentional movement.

When detergents or other liquids are used, read the manufacturer's instructions.

Operators shall be adequately instructed as to the correct use of the machine.

For battery and charger details please refer to your battery and charger original instructions.

This machine is not suitable for picking-up hazardous dust. This machine is not to be stored outdoors in wet conditions. This machine is for indoor use only.

NOTES: This machine is also suitable for commercial use, for example in hotels, schools, hospitals, factories, shops and offices for other than normal housekeeping purposes.

This product meets the requirements of IEC 60335-2-72

- Ensure only competent persons unpack/assemble the machine.
- Keep your machine clean.
- Keep your brushes in good condition.
- Replace any worn or damaged parts immediately.
- Regularly examine the power cord for damage, such as cracking or ageing. If damage is found, replace the cord before further use.
- Only replace the power cord with the correct Numatic approved replacement parts.
- Ensure that the work area is clear of obstructions and / or people.
- Ensure that the working area is well illuminated. Pre-sweep the area to be cleaned.

- Use steam cleaners or pressure washers to clean the machine or use in the rain.
- Allow any inexperienced repairs. Call the experts.
- Leave the brush pad on the machine when not in use.
- Allow the machine to be used by inexperienced or unauthorised operators or without appropriate training.
- Use the machine without the solution tanks properly positioned on the machine, as shown in the instructions.
- Expect the machine to provide trouble-free, reliable operation unless maintained correctly.
- Lift or pull the machine by any of the operating triggers, use the main handle.
- Remove the handle from the machine except for service and repair.
- · Attempt machine maintenance or lifting unless the battery has been removed.

Daily Keep the machine clean.

Ensure brushes/ pads/ squeegee/ filters are in good condition. Check for any worn or damaged parts and replace immediately. Drain and rinse dirty water tank after every use.

Weekly – as daily and –
Check brush or pad and skirt and rinse.
Check floor-tool blades for wear and wipe clean.
Clean separator assembly including filter and check condition of seal.
Flush out system with clean water and clean filters.

Do not steam clean or pressure wash.

Batteries

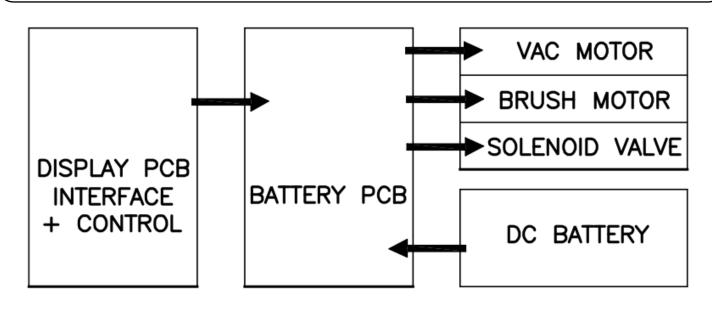

Always re-charge the batteries after use.

Lithium-lon Battery Warranty

Warranty: Commercial Use

- a. Batteries are warranted (1 Year) providing all battery care rules are followed
- b. To claim warranty the following details must be supplied
- i. Serial number of the machine
- ii. Battery date code
- iii. Date purchased
- iv. Proof of Purchase
- v. Maintenance history and charging regime

Failure to use the correct Numatic charger will void your warranty.

A1 4	
Notes	

Numatic International

Numatic International Limited warrant to the original purchaser that its products are free of defects in both material or workmanship for the period shown below:-

Homecare and Cleancare Vacuum cleaners	2 Years
Rotary Floor Machines	2 Years
Twintec Auto Scrubber Dryer	1 Year
Vario Ride-On Scrubber Dryer 1 Year / 150	0 hours
Mopping, Compacts, Combi and Servocare Products	. 1 Year
Individual Accessories and Spare Parts	Months

Note: This warranty expressly excludes consumable parts such as carbon brushes, floor brushes, mops, batteries etc, that are considered replaceable from time to time during the normal working life of the machine.

- A. The warranty period commences from the date the goods are purchased.
- B. All warranty claims must be processed through the Dealer from whom the equipment was purchased. The Dealer will co-operate with the purchaser throughout the warranty claims procedure and will arrange any necessary repairs using genuine Numatic parts.
- C. If the original Dealer is no longer able to fulfil his obligations please contact Numatic International Limited with full details of the claim and proof of purchase so that this may be processed without delay.
- D. Any warranty claim can only relate to the specific part that is proven to be at fault and for which a replacement will be supplied but cannot be extended to constitute a claim against the complete machine.
- E. Numatic International will supply the Dealer with any warranty parts required, subject to the claim being validated, after return of the faulty items in accordance with Numatic International Limited's General Conditions of Sale.
- F. Claims will not be accepted if they are the result of fair wear and tear, misuse or abuse of any kind.
- G. No replacement will be given unless the appropriate evidence of the validity of the claim has been provided to the satisfaction of Numatic International Limited.
- H. Numatic International Limited reserve the right to charge for any unnecessary work carried out as a result of an invalid claim.
- I. No variation to this warranty may be made or implied by any member of Numatic International Limited or its Dealers unless such variation is in writing and authorised by the Company
