

WVD2000-2

The polyform 2000 has established a standard and reputation in industrial use that has stood the test of time with production now in its 20th year.

Twinflo'

First and foremost you have a two-motored Structofoam power head to the full Twinflo' performance specification.

The giant container has a capacity of 90 litres (dry) and is carried on our stainless steel big wheel chassis and provision for emptying is by a standard dump hose facility.

The 2000 has always been very popular in the dairy and food preparation industries where the use of high pressure cleaning processes are commonplace resulting in a lot of water needing collecting nearly all of the time.

Nothing to rust, nothing to dent or scratch and a strong set of 38mm (1½") stainless steel and Structofoam accessories to match.

Motor	Power	Airflow	Suction	Wet	Range	Weight	Size
2400W	230V AC 50/60Hz	80 L/sec	2500mm	70L	26.8m	26.2Kg	640 x 530 x 970mm

Also available 115V/120V specification.
