abco
THE POWER TO CLEAN

Australia's most trusted commercial cleaning products supplier
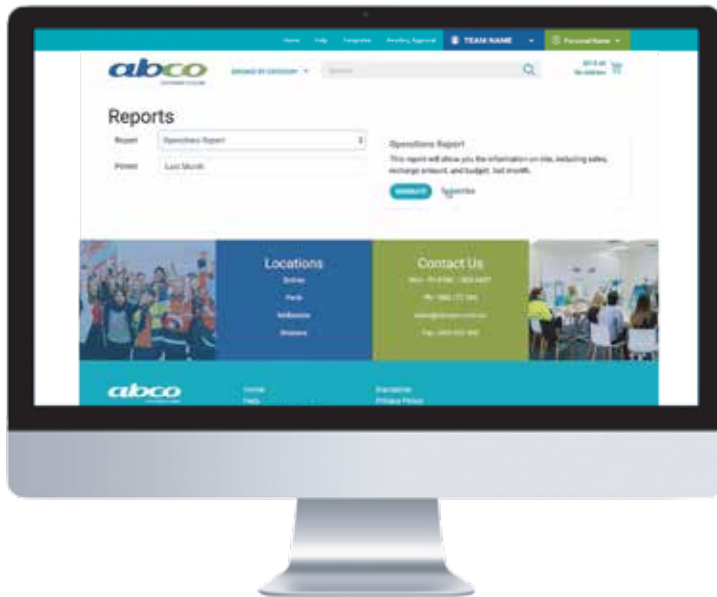

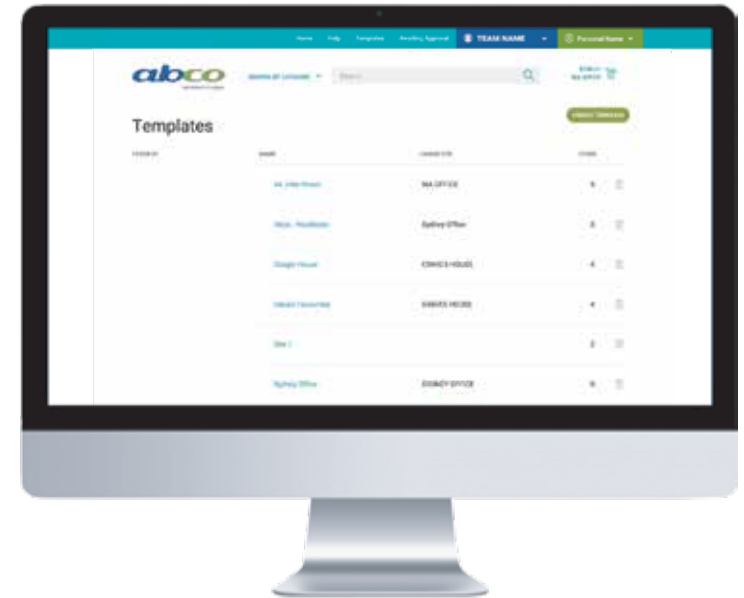

Key Features

SITE TEMPLATES

abconet's new template function lets you set lists of consumables for multiple sites, taking the hassle out of placing repeat orders. You can edit your templates at any time if needed, including applying one template to different sites which helps with managing multiple sites.

✓ Manage multiple sites efficiently

✓ Minimise purchasing errors

✓ Set product lists per site

✓ Speed up ordering

CONSUMPTION REPORTS

abconet offers a range of insightful reports that will help you optimise your ordering processes. From actual vs. budget to consumable tracking per site - we've got you covered. The live reports function, gives you valuable insights on consumption habits which empowers your team to be proactive in reducing costs, and ensuring contract costs don't exceed budgets. You can also request a report to be sent to your inbox instantly, or you can schedule any of the reports to be delivered to your inbox on a regular basis.

✓ Budget and spend insights

✓ Minimise admin costs

✓ Site manager accountability

✓ Automated recurring reports
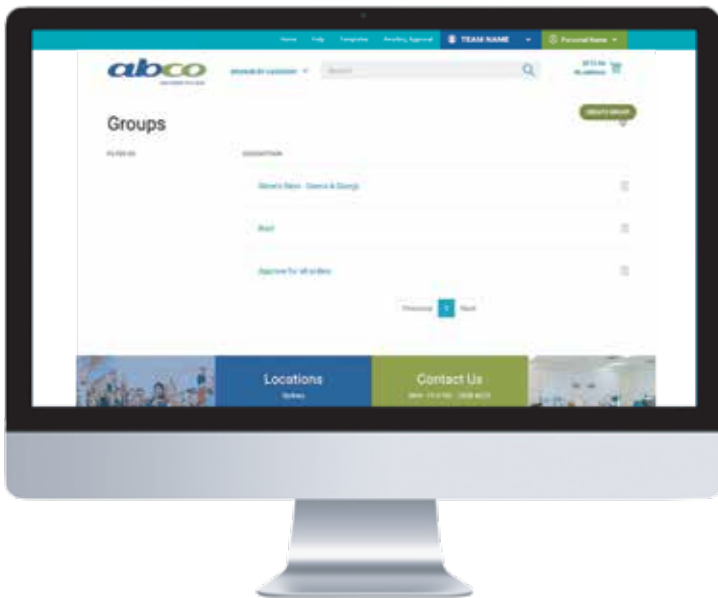

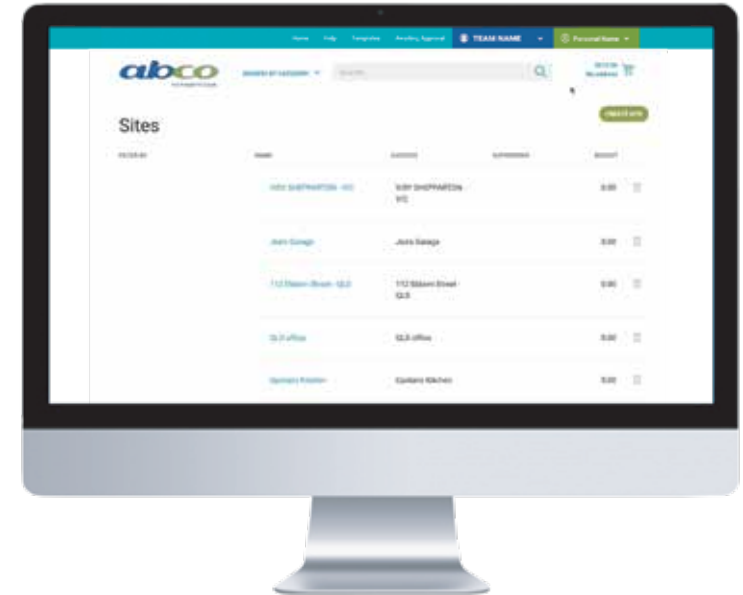

BUDGET MANAGEMENT

abconet's budget functions will help you save time and MONEY! Never go over budget ever again by having set budgets for every site. Set up orders to be approved if spend is going over budget for that site, and you immediately have complete control of any spend over budget, keeping your costs under control.

- ✓ Set budgets per site
- ✓ Budget tracking notification
- ✓ Budget limit controls
- ✓ Budget setting per group

PERMISSIONS CONTROL

The permissions function can help give you full control on how you want to structure your operations process - from managing sites restrictions to authority and permissions levels for your team members, contractor and sub-contractors. Groups enable you to decide who can see what and who can place orders on certain products which helps you manage spend, operations, profitability and compliance from one single portal.

- ✓ Set sub contractors & clients as groups
- ✓ Pricing visibility per group
- ✓ Purchasing permissions per group
- ✓ Set product list per group

Key Features

ORDER MANAGEMENT

abconet gives you unprecedented control on managing order approval. You can now easily select who approves orders and when order approval is required. Choose to approve all orders or only orders over budget. The new order control setting lets you set key stock lists with different levels of permission. You can also schedule future orders to improve your operations process and drive efficiencies in your business.
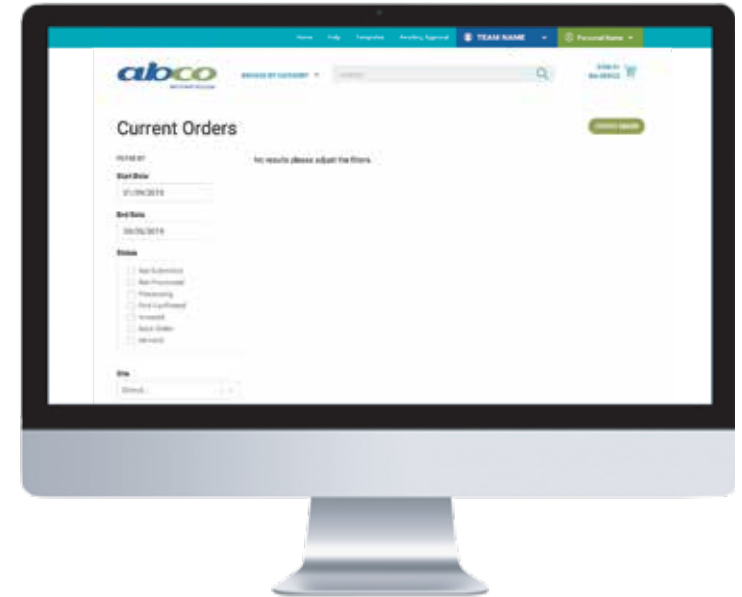

- ✓ Setup approval levels
- ✓ Set order permissions
- ✓ Streamline ordering processes
- ✓ Schedule future orders

Manage Compliance

- SDS compliance
- Staff training management and resources
- Create an approved products list

Track Rechargeables and costs

- Monitor rechargeable items
- Automatic rechargeable cost recovery
- Set and maintain budgets by Site
- Empower your staff through reporting on cost vs budget

Automated Ordering

- Ordering consumable products on a regular basis?
- Set up Recurring Orders and have abconet do it for you

Spend time on what matters

- Give the ordering responsibility to your staff
- Keep control with the option to edit, reject or approve orders at your discretion

Key Features

TANGIBLE SAVINGS of abconet

Case Study – Large Commercial Cleaning Contractor with 500 Sites Nationally.

This data demonstrates the difference in time by utilising a system and process that reduces human interaction.

Based on this data, there is a difference of 32 minutes spent on ordering from site level through to admin between both case studies.

Based on an average hourly rate of $28 and an average of 20 orders per day, you would be potentially saving a total of $296 per day ($5,936 per month)

Large Cleaning Supplier – Order Timeline Case Study

10 MINUTES — Cleaner completes Stocktake of products required on site and sends excel spreadsheet through to admin manager

30 MINUTES — Admin manager separates rechargeable products from non-rechargeable items off the spreadsheet and raises order in system

2 MINUTES — The order is sent via PDF file to supplier's customer service portal.

= 42 MINUTES

Abco Products – Order Timeline Case Study

8 MINUTES — Cleaner completes Stocktake of products required on site and places order on Abconet subject to Approval.

2 MINUTES — Admin manager / Order Approver receives order confirmation requesting stock for site. They log into Abconet and approve the order requested. Once approved, the order is sent directly to the warehouse team. The warehouse run a paperless picking operation whereby all orders are picked off i-pads.

= 10 MINUTES

TANGIBLE SAVINGS OF ABCO'S DELIVERY PROCESS

Large Cleaning Supplier

2 hrs — The supplier receives order and manually enters this into system then releases to warehouse for picking.

15 min — Operations print off picking slip and prioritise according to client request.

60 min — Warehouse pick order and places stock in despatch area.

60 min — Accounts process the order and create invoice.

18 hrs — Dispatch manager arranges third party courier to collect order the next day.

18 hrs — Courier picks up the products and delivers stock to reception.

2 hrs — POD is uploaded to Courier Companies portal. The supplier can access this online using tracking number provided by the couriers consignment.

Total Time Allocated = 42 hours and 15 Minutes

Abco Products

2 min — Warehouse pick the order and place the stock in the dispatch location according to where the goods are to be delivered. Once the order has beed picked, the client will automatically receive an invoice without any human intervention.

60 min — Despatch Manager allocates job to Abco Driver ready for next day deliver

17 hrs — Abco Delivery driver picks up goods and delivers to the client according the specific delivery instructions. This can consist of taking goods up the elevator and packing them into the cleaners room.

0 min — A POD is made available online immediately with a name, date, signature and picture of where the goods were placed in the cleaners room.

Total Time Allocated = 18 hours and 2 Minutes

Case Study – Large Commercial Cleaning Contractor with 500 Sites Nationally.

This case study revealed a significant difference in time between Abco Products and another similar sized supplier.

On average, our customers receive their orders from time of placement 24 hours and 13 minutes earlier than the alternate supplier.

Elite service is a key component to ensuring a high level of customer satisfaction. By combining this service with Abco's order tracking capabilities, the risk of goods not turning up by the required time is removed.

Key Features

abconet INTEGRATION CAPABILITIES
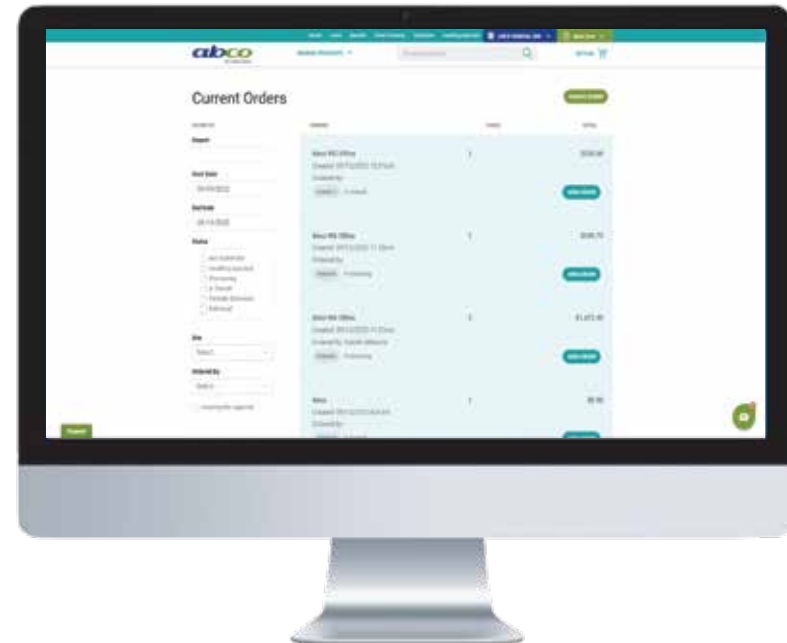

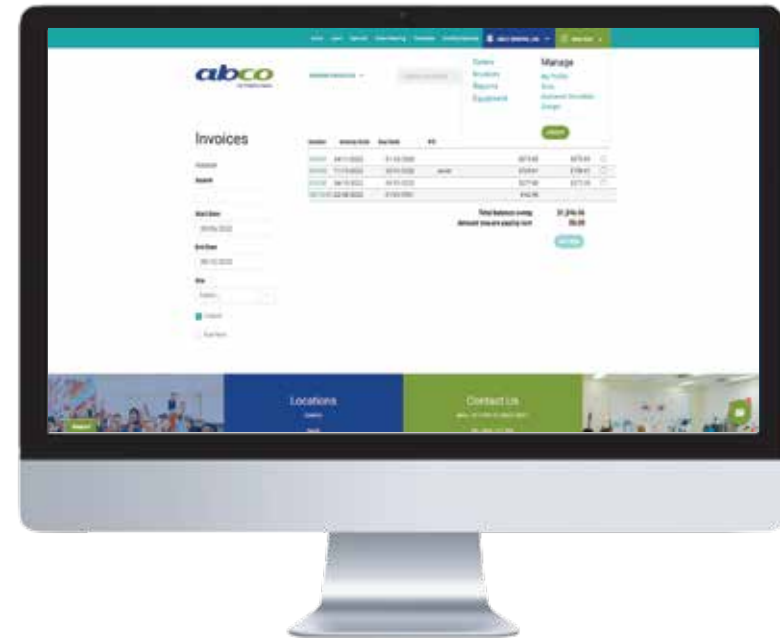

Less manual errors

Process automated - orders notifications, invoices

Ease of reporting/reconciliation - link to your GL codes

Abco has an in-house IT team to support a range of prebuilt systems integration options with abconet, as well as opportunities for bespoke customisation.

These have been developed in partnership with our customers to understand their pain points and to ensure abconet makes the ordering, reporting and management as simple as possible for our customers.
